STANDARD FEATURES

ALL MODELS

Driver/passenger airbags

- Driver's airbag • Front passenger's airbag • Two front seat side-impact airbags
 - Full-size curtain airbags for driver and front and outer rear seat passengers
-

Seating

- Height-adjustable front seat head restraints • Three height adjustable rear seat head restraints
 - Anti-submarining ramps in all seats – Prevents occupants sliding underneath the lap belt during a collision.
-

Seatbelts

- Height adjustable front inertia-reel lap and diagonal seatbelts
 - Three inertia-reel lap and diagonal rear seatbelts • Front seatbelts with crash locking tongues
 - Outer rear seatbelt pretensioner system – Pretensioners tighten the seatbelt in the event of an accident limiting forward movement.
 - Front and outer rear seatbelt force limiters – Reduces potential upper body injuries during a frontal impact.
 - Front and rear 'seatbelt unfastened' audible warning and warning light
-

Child safety

- Deactivation switch for front passenger's airbag – Permits the safe use of a child seat in the front passenger seat.
 - ISOFIX child seat mountings incorporating top tether anchor points located on outer rear seats (does not include child seat) – Allows ISOFIX child safety seats to be securely fixed into the car. The ISOFIX mounting system reduces forward movement in an accident and makes the child seat easier to install.
 - Child-proof locks on rear doors
-

Driver/passenger safety

- Energy-absorbing steering column • Pedal release system – Reduces potential injury to the driver's legs and feet during a severe frontal impact.
 - Laminated windscreen • Side-impact protection beams • Reinforced passenger safety cell
 - Deformation zones front and rear • Burst-proof door locks and anti-jam door design
-

Pedestrian safety

- Bonnet/headlight/wiper structure – Designed to reduce pedestrian head and upper body injuries.
 - Upper and lower bumper design – Reduces upper and lower leg injuries.
-

Stability

- Electronic Stability Programme (ESP) – Works in conjunction with the vehicle's electronic braking and engine systems to keep the car stable in many different situations. ESP monitors many different inputs to determine when the car starts to lose traction, it can then immediately respond by varying the brake pressure between up to three wheels and adjust the engine output to help correct the loss of traction and improve stability.

Additional ESP features:

- Traction control • Cornering brake control • Straight line stability control • Rollover mitigation
 - Drag torque control – Maintain stability on slippery roads when lifting off the accelerator or changing gear.
-

Braking

- Anti-lock Braking System (ABS) – Prevents the vehicle's wheels from locking up under heavy braking by momentarily reducing brake pressure at the appropriate wheel, ensuring that you can maintain control of the steering.

Additional ESP features:

The same electronic systems used in the ABS and ESP also deliver exceptional braking performance.

- Emergency brake assist – When emergency braking is detected the vehicle automatically applies the maximum possible braking assistance.
 - Hazard warning lights • Fading brake support – Compensates for the effects of brake fade.
 - Electronic brakeforce distribution – Automatically apportions the optimum braking force to each wheel.
 - Adaptive brake lights – Automatically warns other road users of heavy braking.
 - Hill start assist – Briefly maintains rear brake pressure to stop the vehicle rolling back on an incline.
-

Tyre pressure

- Deflation detection system
-

STANDARD FEATURES

IntelliLux LED Matrix headlights IntelliLux LED Matrix headlights work with the Driving Assistance Pack One incorporating front camera system, to provide outstanding lighting performance and enhanced safety. Each headlight features a matrix of eight individual LED lights. These lights replace the main beam function and supplement the dipped beam function. Each LED illuminates a separate part of the road ahead meaning that by automatically switching lights on and off, illumination is varied to suit traffic and road conditions. The IntelliLux system calculates which LED lights are activated and deactivated using additional data such as ambient light conditions, vehicle speed, steering angle and when the indicators are used. For example, when the front camera system detects an oncoming vehicle, the individual LED lights that would dazzle the oncoming driver are automatically switched off and then switched back on once the vehicle has passed. All other areas remain fully illuminated. Studies show that the enhanced roadside illumination of IntelliLux LED Matrix headlights give the driver an extra 1.5 seconds of reaction time at 50mph. <ul style="list-style-type: none"> • Dipped beam, main beam and dynamic lighting: 16 electronically controlled LED lights (eight per headlight) • Driving Assistance Pack One incorporating front camera system • Intelligent main beam control • Automatic headlight levelling • LED tail lights 				○	○		●	1,041.67	1,250.00
Every type of driving environment has been considered: <ul style="list-style-type: none"> • Urban light – With street lighting and speeds up to 34mph, the system automatically enhances the dipped beam function. • Highway light – The system recognises when the car is on a dual carriageway or motorway. At higher speeds the light distribution on the right is reduced to minimise glare from the crash barriers. • Country light – As speeds increase, so does the lighting’s performance. • Static Cornering light – At lower speeds corners and bends are illuminated to match steering inputs. • Parking light – When reversing, additional side-facing lights are activated in the headlights. • Energy saving mode – On Start/Stop models, the IntelliLux LED Matrix system goes into Energy saving mode when the engine is automatically stopped. 						○		1,520.83	1,825.00

#Fuel consumption figures are determined according to the WLTP test cycle. Full data relating to WLTP test cycles can be found at: www.vauxhall.co.uk/wltp

*CO₂ emissions figures are determined according to the WLTP test cycle however, a Government formula is then applied to translate these figures back to what they would have been under the outgoing NEDC test cycle, which WLTP replaces. The correct tax treatment is then applied.

Figures are intended for comparability purposes only. The fuel consumption you achieve under real life driving conditions and CO₂ produced will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Only compare fuel consumption and CO₂ with other vehicles tested using the same technical procedures. For more information contact your local Vauxhall Retailer.

#Fuel consumption figures are determined according to the WLTP test cycle. Full data relating to WLTP test cycles can be found at: www.vauxhall.co.uk/wltp

*CO₂ emissions figures are determined according to the WLTP test cycle however, a Government formula is then applied to translate these figures back to what they would have been under the outgoing NEDC test cycle, which WLTP replaces. The correct tax treatment is then applied.

Figures are intended for comparability purposes only. The fuel consumption you achieve under real life driving conditions and CO₂ produced will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Only compare fuel consumption and CO₂ with other vehicles tested using the same technical procedures. For more information contact your local Vauxhall Retailer.

SPECIFICATIONS

Transmission

Five-speed manual gearbox:

Standard on: 1.0i Turbo (105PS)

Six-speed manual gearbox:

Petrol engines: 1.4i Turbo (125/150PS) models

Diesel engines: 1.6CDTi (110/136PS) models

Six-speed automatic transmission with

ActiveSelect® function

A six-speed automatic transmission is optional on 1.4i Turbo (150PS) and 1.6CDTi (136PS) models.

On the road, a wide selection of shift patterns is adapted to the style and habits of the driver, anticipating when maximum acceleration or maximum efficiency is required. The electronic control will also adapt to the prevailing road conditions, reducing gear shifting when climbing or descending and using engine braking assistance during down changes.

The ActiveSelect® manual mode allows the gear lever to be used like a sequential manual gearbox – you simply push the lever forward or back to change up or down the gears. The driver also benefits from a ‘neutral’ gear disengagement at idle, which reduces vibration and contributes to improved fuel consumption.

Gross vehicle weight is the total permissible weight of the vehicle including passengers and their luggage. The **maximum roof rack loading** should not exceed 75kg on all models. The **maximum towing weights** are based on the ability of the car, with two occupants of 75kg each, to restart on a 12% gradient, which is approximately 1 in 8.3, at sea level. The permitted trailer load applies up to the specified incline and up to an altitude of 1000 metres above sea level. The permissible gross train weight decreases by 10% for every 1000 metres of additional altitude. Any extra weight, such as luggage or additional passengers, should be deducted from the maximum towing weight. With a trailer fully loaded, **maximum noseweight** should not exceed 75kg. Always fit Vauxhall towing attachments and accessories available from your Vauxhall Retailer. They are designed specifically for Vauxhall models and carry a 12-month guarantee. During trailer towing do not exceed a maximum speed of 60mph. This speed limit is also applicable in countries with higher permitted speeds for trailer-vehicle combinations. Pay attention to the local speed limits. For trailers with low driving stability and caravans the use of an oscillation damper is strongly recommended.

COMPANY CAR DRIVER AND FLEET INFORMATION

Design and Tech Line High Spec Low P11D

Specifically developed for businesses and company car drivers alike, our Design and Tech Line Nav models are seriously fit for Fleet.

Design models all feature very low P11D values, generous standard specification, including Sat Nav on Design Nav models, and a choice of high tech ecoTEC engines for great fuel economy and low emissions.

For even more standard specification, step up to our Tech Line Nav range. Again you are guaranteed low P11D values, plus great standard kit including Sat Nav, Bluetooth®, USB connection, aux-in socket and digital radio.

With Design and Tech Line Nav you can take for granted low Whole Life Costs and low company car driver taxation.

Company Car Driver Free 3 Day Test Drive

Our free* 3 Day Test Drive programme is open to all Company Car Drivers which allows you to choose any model in the current Vauxhall line-up (exclusions apply). With full insurance cover provided, it gives you a meaningful length of time to make an informed decision about your next company car.

Search Vauxhall 3DTD to book your FREE* test drive or click the link the below:

[Vauxhall 3 Day Test Drive](#)

*The free 3 Day Test Drive programme is open to Company Car Drivers and Fleet Decision Makers. Available for UK Mainland only. Terms and conditions apply. Full terms and conditions can be found at vauxhallfleet.co.uk/testdrive/index/terms.

Benefit in kind company car taxation†

The car benefit charge will be the car's list price (including VAT, options and accessories fitted, delivery to Retailer and number plates, but excluding Vehicle Excise Duty and new vehicle first registration fee) multiplied by the percentage charge for the CO₂ emissions band in which the car falls (see table opposite). Multiply this figure by your personal income tax rate (20%^{††} for Basic Rate, 40%^{††} for Higher Rate) to calculate your annual benefit in kind tax liability.

Example:

Astra Tech Line Nav 1.6CDTi (110PS) Start/Stop ecoTEC 5-door hatchback (CO₂ emissions 107g/km)	
On-the-road RRP	£21,075.00
Deduct: Vehicle Excise Duty	(£170.00)
New vehicle first registration fee	(£55.00)
Effective list price	£20,850.00
Add: Optional two-coat metallic paint	£575.00
List price for tax purposes (P11D value)	£21,425.00
Car benefit charge 2019–20 tax year (29%)	£6,213.00
Benefit in kind tax liability (2019–20 tax year)	
Basic Rate (20%) tax payer	£1,242.60
Higher Rate (40%) tax payer	£2,485.20

†Please note this Price Guide provides taxation information as a guide only. Vauxhall does not provide taxation guidance. Drivers should always take professional advice on their own tax position.

††Excludes residents of Scotland.

BIK FOR SCOTTISH RESIDENTS

Effective 6 April 2018 the Scottish Government have introduced their own BIK taxation structure. This only applies to Company Car Drivers that are Scottish taxpayers. HMRC will determine whether or not an individual is a Scottish taxpayer based on where their main place of residence is.

The BIK rates for Scotland are:

- Over £12,500-£14,549 Starter Rate 19%
- Over £14,549 -£24,994 Basic Rate 20%
- Over £24,994 -£43,430 Intermediate Rate 21%
- Over £43,430-£150,000 Higher Rate 41%
- Above £150,000 Top Rate 46%

FURTHER INFORMATION

On-the-road prices

To eliminate uncertainty about hidden costs when buying a new car, Vauxhall publishes on-the-road recommended retail prices (RRP) and these are shown in the pricing tables within this price guide. These prices include VAT, number plates and delivery to Retailer of £700.00 (including £116.67 VAT), 12 months' Government Vehicle Excise Duty (see opposite for details) and the DVLA new vehicle first registration fee of £55.00.*

Please note: The on-the-road recommended retail price (RRP) does not include fuel supplied by the Retailer, motor insurance or any other goods or services supplied by agreement between the Retailer and the customer.

Price protection

Order a new Vauxhall for build in the current model year (as confirmed by your Retailer) for delivery no more than three months in advance and the price you are quoted is the price you pay. This is irrespective of any subsequent price rises between placing your order and delivery of your new car, but you must take delivery as soon as the car is available. Vauxhall Motors Limited is not liable for price adjustments caused by Government changes in the rate of VAT (currently 20%), Vehicle Excise Duty, DVLA new vehicle first registration fee or by any other applicable legislation or regulations.

Vauxhall Finance Leasing

Vauxhall Finance Leasing is a trading style of Vauxhall Finance plc. Working with the Vauxhall Retailer network we provide competitive car and van leasing solutions for business users and private individuals. We combine the support of a national contract with the convenience of a local contact.

For further information, please contact your local Vauxhall Retailer or visit www.vauxhall.co.uk/leasing

In the event of an accident

Vauxhall Accident Management helps keep you mobile following an accident. Benefits include vehicle recovery, Vauxhall-approved repairs and contacting your insurer. For more details, visit www.vauxhall.co.uk/AccidentManagement

Vehicle Excise Duty

The amount of Vehicle Excise Duty (road fund licence) payable on new cars varies depending on the level of carbon dioxide (CO₂) emissions produced by the vehicle. CO₂ emissions are measured in grams per kilometre (g/km) travelled and divided into 13 charging bands shown in the table opposite.

A 'first year rate' of Vehicle Excise Duty is payable on all new cars and in subsequent years the amount payable reverts to the 'standard rate'. From 1 April 2017 the breakpoints for each of these bands have been revised. Also, for vehicles with a list price over £40,000, including factory-fitted options, an additional £320 is payable for the first five years of standard rate payments.
