# It's got the power

The new Grandland Plug-in HYBRID-e gives you more than just another SUV. With up to 225PS combined petrol-electric power and a 39-mile pure electric range that will cover your daily commute plus a 1.6 180PS Turbo petrol engine for longer journeys. It achieves all this while keeping your emissions low and costs down. If we're talking figures, that's up to 192mpg with CO<sub>2</sub> of only 31g/km.

These figures were obtained using a combination of battery power and fuel. The new Grandland Plug-in HYBRID-e requires mains electricity for charging. \*WLTP Figures shown are for comparison purposes and should only be compared to the fuel consumption, CO<sub>2</sub> values and electric range of other cars tested to the same technical standard. The fuel consumption and electric range achieved, and CO<sub>2</sub> produced, in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); charging frequency; battery condition; variations in weather; driving styles and vehicle load.
