

COMBO

2018 Models Edition 1

BE THE BUSINESS.

When you're choosing a commercial vehicle, you need the right tool for the job. So welcome to our range, which includes four award-winning models Corsavan, Combo, Vivaro and Movano – with over 300 variations for every kind of job, from panel

vans, chassis cabs, crew cabs and platform cabs to box vans, tippers, dropsides and passenger carriers. Even better, our reliable, fuel-efficient vehicles are supported by a dedicated network of retailers across the UK, giving you expert help

when and wherever you need it. And another thing – not only do we build more commercial vehicles than any other UK manufacturer (almost 74,000 built in the last year), we've won over 30 major awards since 2010, given by the toughest

judges in the industry. But what exactly does that mean for you? Well, it means you always know your van is made by the best in the industry, supported by professionals who care about doing a great job just as much as you.

Now isn't that the business?

COMBO. COMPACT, CAPABLE.

Want to give your business a lift? Then get yourself a vehicle that delivers a long list of commercial firsts. Roomy, accessible and more than capable in the cargo department. It's also dependable, versatile and efficient to run. And with long wheelbase, high roof and Crew van models available, it's as practical as ever. With capabilities such as these, one thing is certain: Combo really can help your business deliver.

Some of the vehicles shown include options and accessories available at extra cost. And not all of the features described are available on every model. For model and equipment availability please refer to the latest Commercial Vehicle Range Price and Specification guide, available to download from vauxhall.co.uk for details.

A LOAD OFF YOUR MIND.

Combo is quite simply first class. Not only does it have one of the longest and most spacious load areas in its class, but it also has the highest rear axle weight combined with a useful, low rear loading height. The Combo Crew van, including the Sportive model adds a comfortable three passenger rear seat and convenient twin sliding side-access doors. When it comes to key business tools, you always invest in the best. In both the long and short term, that makes it a seriously good investment.

A weighty proposition. The benefits don't end there. Combo 2300 models can haul over a tonne. Yet the Combo boasts impressive fuel consumption figures – most notably on the 1.3 turbo diesel engine with Start/Stop technology. It also has the longest wheelbase in its class, promoting excellent driveability. That's quite a combination and one less thing for business operators to worry about.

A COMFORTABLE WORKPLACE.

Combo has all the creature comforts needed to create the ideal working environment. The facia is clearly laid out, switches easy to reach and controls easy to operate. And with reach- and rake-adjustable steering and a four-way adjustable driver's seat, you can quickly achieve the most comfortable driving position. Better still, the high-set seating provides an excellent view of the road. Other standard features include a fully-featured CD player/radio, while a broad choice of options – including Bluetooth® and USB connectivity – let you fine-tune your working environment with the business tools you need. Combo is also packed with practical stowage solutions that make light work of organising your cab.

A PRACTICAL PERSPECTIVE.

Reduce your overheads and increase your potential for growth. With its high capacity and low running costs, Combo really can give your business a competitive edge. At the business end, a range of custom-fit options allows you to transport all manner of loads, efficiently and safely – from parcels and pipes to ladders. With a massive 5.0cu.m of loadspace volume and a payload of over a tonne, the L2 H2 van can handle even larger items. Even with heavy machinery on board, the handling stays sharp and the ride comfortable. And with an L2 version of the Crew van available there's ample loadspace available even with up to five occupants on board. All of which means that Combo appeals more than ever to today's business user.

VX_N_COM_18394

Instant access. Combo is big on convenience. Offside and nearside sliding side-access doors are fitted to all long wheelbase and Crew van models; a nearside sliding side-access door is also standard on short wheelbase Sportive models. Together, the doors add even greater loading versatility to the van's load carrying potential, while allowing convenient access to cargo via the side of the vehicle. This is a particular benefit where the need arises for access to the offside of the vehicle. A glazed side door option is also available.

BUILT BY EXPERTS FOR EXPERTS.

Whatever your trade, there's a Combo that gets the job done.

With four distinct body styles – offering a choice of two GVW's, long or short wheelbases with high or standard roof and the versatile Crew van variants – the Combo range lets you select the configuration that's the exact fit for your business, meeting your requirements more closely than any previous Combo model. In addition the un-glazed Combo Crew van is officially classified as a Commercial Vehicle for VAT purposes meaning that as a business you can reclaim the VAT*. And whichever version you choose, our design experts have ensured that your Combo will always be fit for purpose – a factor reinforced by a wide range of options and accessories. So whichever way you look at it, choosing Combo is a win-win decision.

*Subject to the rules applicable to VAT recovery (not available on glazed Crew van).

LOADED WITH INNOVATION.

At a massive 3.4cu.m for the short wheelbase, standard roof version, there's no mistaking Combo's cavernous load area. The cargo space will comfortably swallow everything from Euro pallets to plant equipment and heavy machinery. For even bigger items, there are high roof and long wheelbase versions; combine both and you have an impressive 5.0cu.m of loadspace available while the maximum load height of high roof models is over 1.5m.

The practical Crew van extends that versatility even further with L2 models offering 1.9cu.m of loadspace and a load floor length of over 1.3m with the rear bench seat in place. Adding to the Combo's appeal is a wide range of load area options – including a handy load flap and internal ladder carrier – which let you exploit Combo's remarkable carrying potential to the full.

1

VX_N_COM_17514

Load up. Open the rear doors and you're looking at a record holder. Quite simply, the Combo has one of the biggest payloads in its class. It also boasts one of the longest and most spacious cargo areas plus a low rear loading height, so there's less risk of straining your back while working.

1. Full-height bulkhead*. A full-height steel bulkhead – with optional glazing **2** – provides valuable protection against shifting loads, while glazed rear door options enhance rear visibility. A protective ladder frame behind the rear seats is available on Crew van models at no extra cost.

3. Rear side panel storage*. A storage bin located above the rear wheel arch provides handy stowage for loose items.

4. Load flap*. The optional load flap is ideal for accommodating extra long or tall items. Simply unfasten the latch located underneath the flap and the rear section opens, up to an angle of 46°. This provides a handy 916mm x 503mm aperture.

5. Ladder carrier*. Fit these optional bars in your panel van and you can fix a foldable ladder out of sight under the roof where it won't get in the way of your other gear.

*Not available on Crew van models.

ALL SORTED.

From a practicality perspective the Combo has everything sorted. A host of clever in-cab storage features make light work of organising your cab for a busy day out on the road. Sportive, Crew van and all high roof models also feature a cross cab overhead storage shelf. A choice of rear door applications with an extra-low loading height completes the picture.

1. Asymmetrical rear doors. Combo comes with asymmetrical rear doors as standard, which can be specified glazed. **2.** H1 models can also be ordered with a glazed tailgate option*. Both extra cost, the glazing options feature wiper(s) and heated rear window, and must be ordered in conjunction with the glazed bulkhead option. The standard offer can be the more practical proposition when access to the load area through the rear doors is limited (for example, when operating in tight space). In both instances, the extra-low sill height (just 545mm) makes for ease of loading and unloading.

*Glazed tailgate is standard-fit on glazed Crew van models, unavailable on unglazed Crew vans.

3.4.5. Practical storage features. Combo is full of practical storage features to assist with keeping the cabin safe and tidy, such as a recessed storage facility in the upper fascia, lockable glovebox and door pockets.

6. Overhead storage shelf. Sportive, Crew van and all high-roof models feature an overhead storage facility that's ideal for holding folders, worksheets and items you need close at hand.

EASY DOES IT.

From the ergonomically designed fascia and fully adjustable driver's seat through to electric windows and air conditioning, the Combo range is simply packed with features designed to make the driver's day more comfortable. Options like cruise control, rear parking distance sensors and electronic climate control further enhance driver well-being. The result: a mobile working environment you really won't mind spending time in.

1. Clean design. Combo's fascia is clearly and simply laid out, with controls easy to reach and just as easy to operate. Switchgear is logical and the high-mounted driver's seat provides an excellent all-round view of the road.

2. Electronic Climate Control (ECC). Optional on Sportive and Colorado models in conjunction with exterior temperature sensor and electrically heated/adjustable door mirrors, the ECC system features individual temperature controls for the driver and passenger.

3. Reach- and rake-adjustable steering. Reach- and rake-adjustable steering is fitted as standard, ensuring a perfect driving position.

4. Adjustable driver's seat. Combo models feature a four-way adjustable driver's seat with adjustment fore and aft plus tilt. The six-way adjustable 'Comfort' driver's seat (illustrated right) on Sportive models adds height and lumbar adjustment plus a handy armrest.

SAFE AND SOUND.

Safety in the workplace is a vital concern for any business and Combo is no exception. The protection starts with a sturdy passenger cell made of high-grade steel, plus Electronic Stability Programme-Plus (ESP-Plus) with hill start assist and traction control, an airbag for the driver and ABS with electronic brakeforce distribution. Key safety options include rear parking distance sensors, passenger and side-impact airbags.

An informed driver is a safer driver, so Combo can also be specified with an optional CD/MP3 CD player/stereo radio, along with wireless Bluetooth® connectivity for ease of communication on the move and provision for a satellite navigation system to keep you heading in the right direction.

1. Hill start assist. Maintains the brake pressure for a short period after the brake pedal has been released when pulling away on a gradient of 5% or more; this helps prevent the vehicle from rolling back. The pressure is released as soon as the driver presses the accelerator and the vehicle begins to move forward. This ensures improved hill starting for increased comfort and safety. Standard on all models.

2. Rear parking distance sensors. Optional rear parking distance sensors provide an audible warning to help prevent accidental damage when parking or reversing.

3. Four airbags. A driver's airbag is standard on all models with the option to add a passenger airbag and side-impact airbags for improved protection in the event of a collision.

4. Steering wheel-mounted audio controls. Allows you to access all the functions of the optional CD 50 unit without taking your eyes off the road – or your hands off the wheel. You can adjust speaker volume and the text message read-out, accept incoming calls or set voice recognition and stereo options.

5. Aux-in socket and USB port. Conveniently situated for optimum ease of use, the optional aux-in and USB port enable drivers to connect their mobile devices and so access a range of multimedia files, including MP3, MP4 and WMA.

6. CD 50 with multimedia reader*. This optional hands-free system incorporates Bluetooth® technology, an SMS message reader and a CD/MP3 CD player/stereo radio. It can access MP3 players and other devices via the aux-in socket and USB port.

TomTom pre-installation kit. Also part of the Driver Pack, provides the essential wiring for a TomTom navigation system (excludes satellite navigation system and phone cradle).

Driver Pack. Drivers looking to create the ultimate working environment can specify the optional Driver Pack at extra cost. The pack comprises a CD/MP3 CD player/stereo radio with Bluetooth® connectivity, aux-in socket, USB port, steering wheel mounted audio controls, leather-covered steering wheel and gear knob along with pre-installation for a TomTom navigation system (excludes satellite navigation system and phone cradle).

*Also available as a separate option.

POWER AND EFFICIENCY.

How well a vehicle holds a load is one thing. How well it shifts that load is another...

When it comes to everyday driving, Combo's bi-link independent rear suspension gives you the best possible ride quality and handling – even when you're hauling heavy loads. But Combo doesn't only ride and handle like a dream; it also performs with remarkable verve for what is, to all intents and purposes, a working vehicle. Drivers can select from four powerful yet efficient Euro 6 compliant turbo-diesel engines and a 1.4i (95PS) Start/Stop petrol unit. All five engines are designed for optimum ease of serviceability and low running costs. The diesel range comprises 1.3CDTi (95PS), 1.3CDTi (95PS) Start/Stop, 1.6CDTi (105PS) and 1.6CDTi (105PS) Start/Stop. Start/Stop switches the

engine off when you stop at the lights or in traffic, then restarts it once the clutch is depressed, cutting fuel bills and reducing emissions. Combo drivers can also look forward to long service intervals (two years/21,000 miles*) and excellent fuel consumption for the 1.3CDTi (95PS) engine with Start/Stop.

Gearshift indicator. All models have a gearshift indicator easily visible in the instrument cluster, informing the driver the optimum time to change gear for maximum efficiency.

ENGINES DATA**

	Urban driving	Fuel economy mpg (litres/100km) [#] Extra-urban driving	Combined figure	CO ₂ emissions (g/km) [#]
Petrol

*Or oil-life quality monitor warning whichever is the sooner (two years/18,000 miles for 1.4i petrol engine). **For more detailed technical data, please refer to the Commercial Vehicle Range Price and Specification guide, available to download from vauxhall.co.uk #Fuel consumption information is official government environmental data, tested in accordance with the relevant EU directive. EU-regulated test data is provided for comparison purposes and actual performance will depend on driving style, road conditions and other non-technical factors. S/S = Start/Stop.

THE COMBO COLLECTION.

Whatever your line of business, whatever cargo you're carrying, there's a Combo to suit all operators – and all budgets – including the L2 H2 variant and versatile Crew van models. The choice is entirely down to you. Here's a brief overview of the wide range of models available.

To help you select the Combo that's just right for your business, we've adopted a straightforward naming scheme. L stands for Length: there are two versions available, L1 (short wheelbase) and L2 (long wheelbase). Height (H) comes in two sizes, H1 (standard roof) and H2 (high roof). For details of the complete model line-up, please refer to the Commercial Vehicle Range Price and Specification guide available from your Vauxhall retailer or online at: vauxhall.co.uk

Standard or high roof.

The high roof adds an extra 245mm compared to the standard version.

L1 H1 Panel van: Short wheelbase, standard roof. The consummate all-rounder, with up to 3.4cu.m of loadspace. Note: the load area is one of the widest and longest in its class.

L2 H1 Panel van: Long wheelbase, standard roof. The 3.1m wheelbase gives you up to 4.2cu.m of cargo volume.

L1 H2 Panel van: Short wheelbase, high roof. Go up in size with 4.0cu.m of loadspace.

L2 H2 Panel van: Long wheelbase, high roof. The high and the mighty with 5.0cu.m of loadspace.

L1 H1 Crew van: Short wheelbase, standard roof. The ability to seat five without compromising load carrying potential.

L2 H1 Crew van: Long wheelbase, standard roof. Ultimate versatility. Carry up to five or up to 1.0cu.m of cargo volume with the seats folded up.

VX_N_COM_19948

VX_N_COM_19949

VX_N_COM_19952

VX_N_COM_19954

Crew van, versatility. Both Crew van models feature easy access to the rear seats via twin sliding side-access doors. A 60/40 split-folding rear seat arrangement means maximum versatility too. A ladder frame bulkhead is optional at no extra cost.

Combo Colorado. Based on a fully glazed Crew van this new model also includes fixed glazed windows to the rear side panels making it the perfect solution for passenger carrier or wheelchair accessible conversions.

A choice of rear doors. All Combo panel vans and the unglazed Crew van come with asymmetrical rear doors as standard or can be ordered with a tailgate option complete with a wiper and a heated rear window as an extra cost option*.

Glazing options.** Fixed glazed windows for the nearside sliding side-access door and opposite panel or door are available as an extra cost option. In addition, the standard, unglazed asymmetric rear doors are available glazed as an extra cost option and come complete with wipers and heated rear windows. In addition glazed Crew van models are now available featuring sliding glazed side windows and a glazed tailgate as standard.

*Standard on glazed Crew van and Colorado models, not available on H2 panel vans or unglazed Crew van. **Not available on unglazed Crew van. †For an exact definition, please refer to the Glossary of Terms section within the Commercial Vehicle Range Price and Specification guide, available to download from vauxhall.co.uk

COMBO.

Known simply as Combo, the base panel van model features stylish good looks while providing a well-equipped and cost-efficient introduction to the line-up.

Standard features include:

- Electronic Stability Programme-Plus (ESP-Plus)
- Anti-lock Braking System
- Driver's airbag
- Seatbelt pretensioner system
- Remote control central deadlocking
- Lockable fuel filler cap
- Electronic engine deadlock immobiliser
- Lockable glovebox
- CD player/radio with four 20-watt speakers
- Reach- and rake-adjustable steering column
- Reach- and rake-adjustable seats
- Cube cloth seat trim
- Overhead shelf (H2 models only)
- Electrically operated front windows
- Body side-protection mouldings
- Windscreen wipers with variable intermittent facility
- Unglazed asymmetric rear doors
- Full-height steel bulkhead
- Load restraint lashing eyes
- Illuminated load area
- Nearside/offside sliding side-access doors (L2 models only)
- 15-inch steel wheels with centre covers (2000 models)
- 16-inch steel wheels with centre covers (2300 models)

VX_N_COM_18062

VX_N_COM_18097

Reach- and rake-adjustable steering. Reach- and rake-adjustable steering is fitted as standard, ensuring a perfect driving position.

VX_N_COM_18063

Electric windows and central door locking. Electric windows and central door locking are also standard, promoting security, comfort and convenience. The central locking system features security deadlocks for added protection.

Genuine Vauxhall Accessories are the right choice for your Combo. Whatever your business requirement there's certain to be a Vauxhall accessory that fits your need, all fitted by trained Vauxhall professionals. The products shown here are just a small sample of the range available. For a full list, please refer to the Commercial Vehicle Range Price and Specification guide or visit our website at: vauxhall.co.uk/accessories

6. Roof base carrier. Our roof rack system begins with this versatile base carrier, comprising three lockable T-track bars. Compatible with a wide range of Thule attachments. Easy to fit and remove.

7. Roof rack tray. Ensures all items carried on the roof are kept safe and secure. Features a load roller to assist in loading heavy and/or long items.

8. Thule ladder tilt and side profiles with load stop. A special extension bar reaches down over the side of the van so you can quickly load and unload a ladder without stretching. The side profiles with load stop enable large diameter loads of over three metres to be carried safely. Strong ratchet tie downs are provided with both systems.

9. Rear window protection grilles. Help avoid theft while retaining rearward visibility. Can also prevent incidental damage caused by shifting loads.

10. Load area protection panels. Shaped to fit over the floor and side panels to protect the load area.

Towing bar. We offer a wide choice of tow bars, from fixed and removable designs to heavy-duty tow hooks and flange balls.

Not all of the options and accessories described are available on every model. So please check the latest Commercial Vehicle Range Price and Specification guide, available to download from vauxhall.co.uk for details.

COLOURS AND TRIMS.

Combo's business-like appearance is exemplified by the smart choice of colours available. The cloth or vinyl trims have been chosen as much for their hard-wearing properties as they have for their strong visual appeal.

Due to the limitations of the printing process, the colours reproduced may vary slightly from the actual paint colour and trim material. As a result, they should be used as a guide only.

Mike Sinclair, Senior Property Partner, Aberdeen Considine said...

'Our fleet of 23 Corsavan Sportives is a reflection on our business, reinforcing our professional image. Not only that, we've found them economical, reliable and fun to drive.'

Jonathan Mounsey, Managing Director, JD Mounsey said...

'The plan is to become a 100 per cent Vauxhall Fleet. There's no better combination of residual value, low running costs and reliability. They do the job.'

Russell Lelliot, Managing Director, RSL Transport said...

'We've been running Movanos for years. Our two new Movanos save around 4mpg when full, compared to the old models. Which over almost 3000 miles per week per van, is a big saving!'

**Richard Fox,
Managing Director,
ITE Projects said...**

‘Our flexible and fast paced approach to our projects is well served by the Combo van, with an impressive payload capacity it is able to carry crucial equipment to our clients’ sites. We rely totally on our vehicles to ensure we are available 24/7 to service our customers’ critical requirements. The Combo van is proving to be as reliable as we are.’
